Why entering the metaverse / Web3
with a virtual shop, office, showroom, event venue...?

© *The Copyright of all the creative ideas that compose this proposition are owned by Threedee World*

	In the physical world	In the virtual world
reach	Depends on the visitors passing through. So, depending on the location and the opening hours	The whole world can visit your virtual venue at any time. That means many more visitors and traffic
rental prices	Paying thousands of dollars for a property you can't change anything to without expensive fees	For a few hundred euros you can already rent a venue in the metaverse, customizable whenever you wish
expenses	Cleaning, repairs... The costs often run high	Expenses besides the rent or purchase of a virtual building or virtual land aren't there
staffing	A physical store or office needs to be staffed, visitors or not	Personnel are only deployed when there are customer requests or inquiries. Thus, the efficiency is much higher
exit	Terminating a commercial lease is an expensive business. Termination fees and severance payments won't get you anywhere	Discontinuing your virtual store or office is a matter of a click
